DFAS-DE 7000.1R, 31 December 1996, is supplemented as follows.

SUMMARY OF REVISIONS

This revision incorporates the procedures formerly in DFAS-DER 170-5/AFRES Sup, 10 May 96 and aligns our supplement with current instructions within DFAS-DE 7000.1-R.

C3(Added) (AFRC). Use of responsibility center/cost center (RC/CC) structure has several advantages. Managers of RC/CC codes can react quickly to changes in local conditions, as they understand the details of the operation measured by their cost management reports. Through awareness of the costs (and funding limits) applicable to their functional area, RC/CC managers receive valuable management information. RC/CC managers must fully participate in activities of their unit's financial management board. The unit's financial analysis officer must train RC/CC managers and emphasize that: first, RC/CC managers must not place goals of their sub-unit ahead of goals of the organization; and second, RC/CC managers must understand how their decisions affect other sub-units of the organization. RC/CC manager training costs, as well as costs of gathering and processing information, rise as the number of RC/CC codes increases. Base every decision to establish additional RC/CC codes on a careful cost/benefit evaluation.

C4(Added) (AFRC). Within this command, resource management systems promote decentralization of financial management. The RC/CC is an organizational device to facilitate decentralization and to measure costs at the organizational level where managers actually control those costs. Development, maintenance, and distribution of RC/CCs are monitored by HQ AFRC/FMAP.

D2. AFRC standardized lists of RC/CC codes are the minimum AFRC requirements for collection of costs. Within the framework of the basic regulation and this supplement, numbered air forces (NAF) and units must decide for themselves which RC/CC codes they want to use, establish responsibility centers, and train financial managers to administer responsibility centers. Each AFRC organization must establis

responsibility center managers (RCM), at the levels identified in paragraph D3(g) (added) of this supple ment. RC/CCs identified by mission design series (MDS) and RC/CCs XX45XX are mandatory and cannot be altered.

D3(e)(Added) (AFRC). Tenant Units. AFRC units with their own OBAN that are a tenant on bases of other MAJCOMs will use "M" as the first digit of their RC/CC codes.

D3(f)(Added) (AFRC). AFRC Bases. Expenses of contract operated installations (COI), when covered in a single contractual agreement or when service is provided by a single contractor, use "C" as the firs digit of the RC/CC code. All others will use numeric "1." Those installations operating under COI will be required to use a dual structure.

D3(g)(Added) (AFRC). The second position of the RC/CC will be related to the echelon as shown below:

RC/CC	CONVERSION RC/CC	TITLE	ECHELON
X0XXXX	XAXXXX	Commander	NAF/wings/groups
X1XXXX	XBXXXX	Operations	NAF/wings/groups
X2XXXX	XCXXXX	Logistics	NAF/wings/groups
X3XXXX	XDXXXX	Support	NAF/wings/groups
X45XXX	XEXXXX	Medical	Wings/Groups
X9XXXX	XKXXXX	Other	All
XRXXXX	XLXXXX	Recruiting	All

D3(h)(Added) (AFRC). These second position RC/CC prefixes represent the minimum number of RCMs established within AFRC organizations.

D3(I)(Added) (AFRC). RC/CC mission conversion costs:

(1) When conversion costs occur during the same fiscal year as the official conversion date, establish applicable RC/CCs with gaining Program Element Code (PEC).

(2) When conversion costs occur before the fiscal year of conversion, establish costs in the new PEC. *NOTE 1*: Second digit of the RC/CC is an alpha..

J(Added) (AFRC). Each unit (AFRC base and AFRC tenant) identifies RC/CC codes from the AFRC standard list of RC/CC codes (attachment 1) to build its code structure. The sixth position of the MDS RC/CCs is shown below:

SIXTH POSITION OF RC/CC

XXX0	A-10
XXX1	OA-10
XXX2	F-16
XXX3	C-130

XXX4	AC-130
XXX5	C-141
XXX6	C-5
XXX7	KC-10
XXX8	KC-135
XXX9	C-17
XXXA	C-9
XXXB	HH-60
XXXC	EC-3
XXXD	WC-130
XXXE	HC-130
XXXF	B-52

J1(Added) (AFRC). RCMs/Resource Advisors (RA) must refer to DFAS-DE 7000.1-R, 31 December 1996, when establishing organizational LG RC/CCs to support the command flying hour program. RC/CCs contained in attachment 2 appear to duplicate organizations. Descriptions provided in the DFAS-DE 7000.1-R, 31 December 1996, will determine which MDS RC/CC is applicable to your unit.

J2(Added) (AFRC). Submit proposed mechanized RC/CC structure to HQ AFRC/FMAP by 1 August of each year for review/approval. Furnish your accounting support location a copy of the AFRC approved RC/CC structure by 1 September of each year.

J3(Added) (AFRC). RC/CC codes not in attachment 1 of this supplement are not authorized for use until approved by HQ AFRC/FMAP. Forward your request for changes in the following format. Include rationale for changes.

(a) OBAN.

(b) RC/CC Code (6 digits).

(c) Program Element Code.

(d) Functional Category Code.

(e) DOD Functional Category Code.

(f) RC/CC Description/Title.

(g) Project Funds Management Record (PFMR) (if applicable).

(h) Organization Cost Center Record (OCCR) (if applicable).
